Innovative solutions for the railway sector

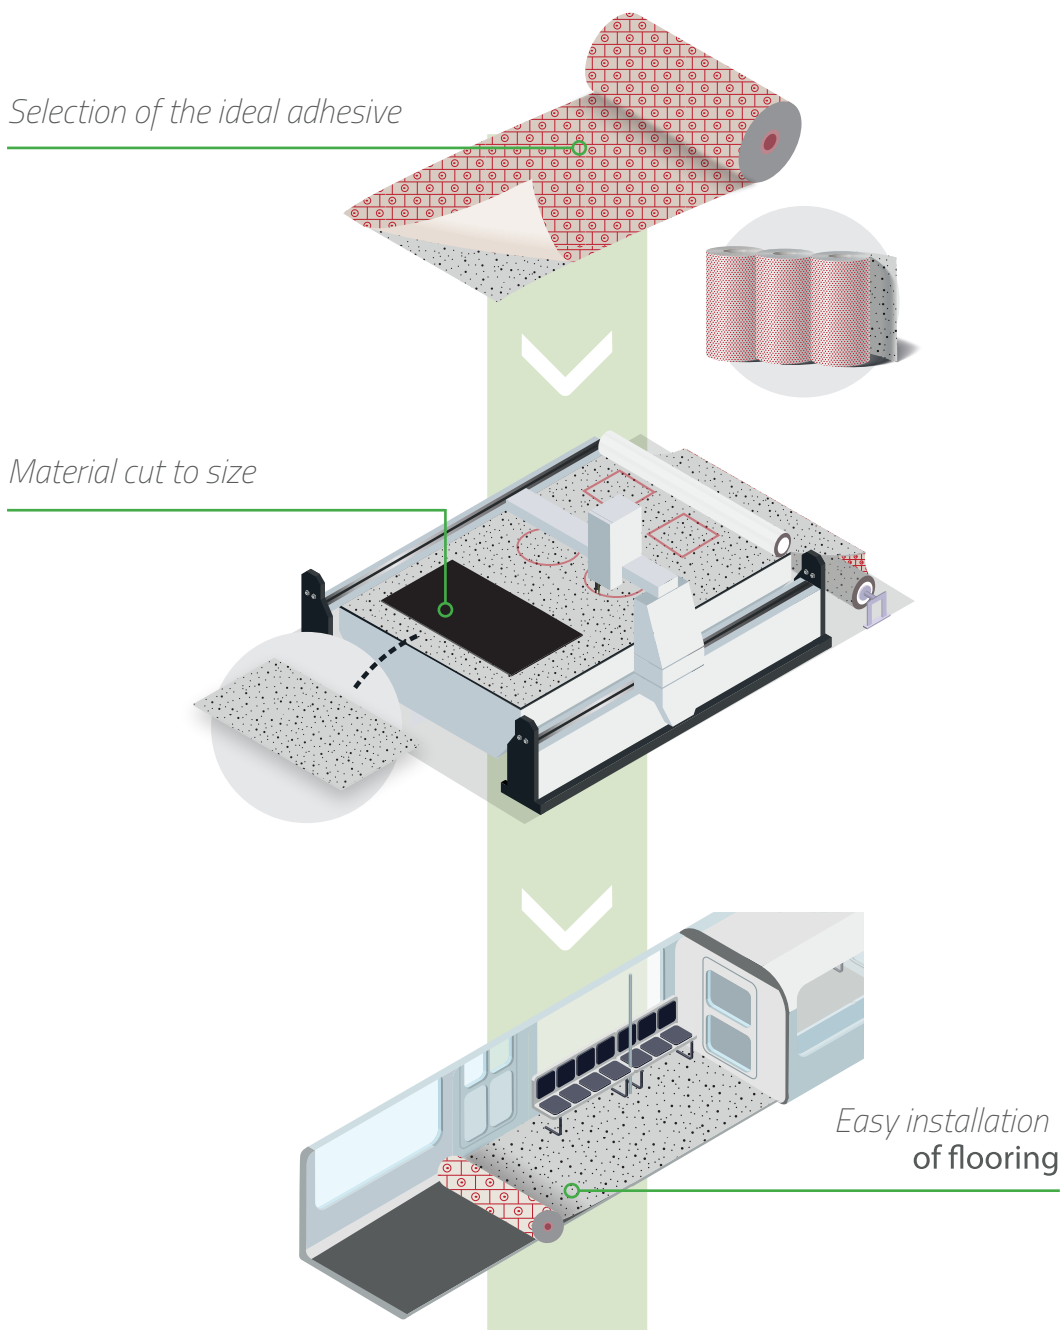

*Pre-adhesive applications
ready for installation*

www.eximport.es

Cutting and laminating technology

We have the latest technology with the capability to transform materials up to 4.5 meters wide without seams, collaborating with manufacturers on the most efficient solutions for the railway industry.

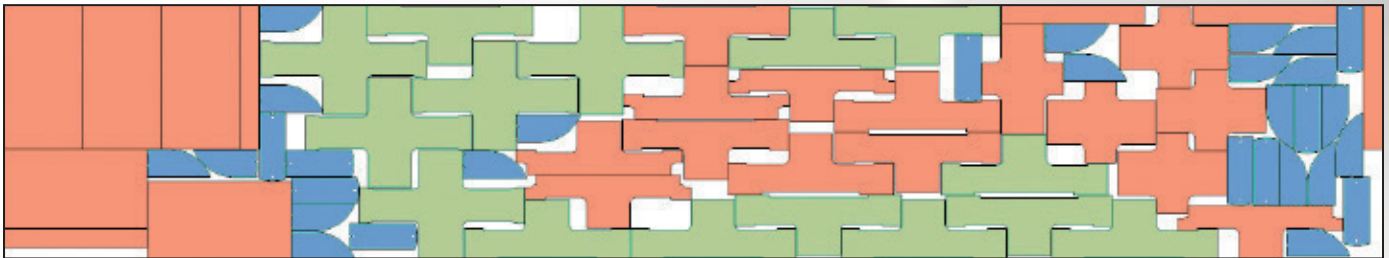

We offer a complete process, delivering solutions ready for assembly and responding at all times to the specific needs of each project, accompanying your production pace.

Main advantages

- ✓ Optimization and utilization of the chosen material (flooring, carpet, or others).
- ✓ Time savings, cost reduction, and waste minimization.
- ✓ Immediate response in case of design changes by the customer.
- ✓ Supply cadence adapted to the specific needs of each company.
- ✓ Control of the necessary stockpile for the realization of a project.

Material utilization efficiency *of over 95%*

Example of a manufacturing layout.

DIN 6701 Certification

At Eximport, we are certified under the DIN6701 standard, which guarantees the quality of processes and adhesive joints in the railway industry.

Wide range of suppliers

Horizontal signage

We take care of every detail, such as the integration of PMR indicators. This signage is manufactured through intarsia, thus preserving the mechanical properties of the

Preferred Converter in Spain

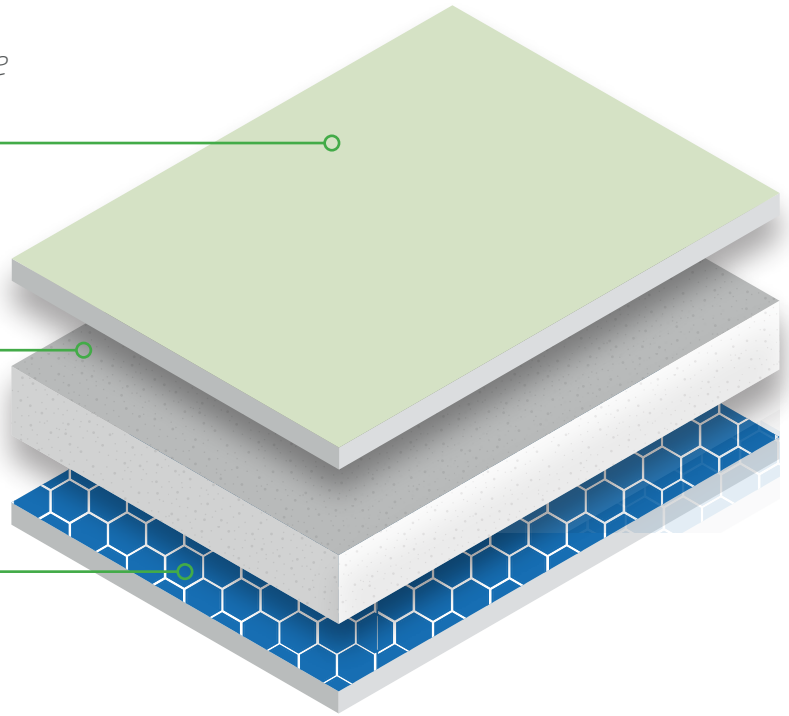

Custom manufacturing of lightweight panels for flooring, partitions, and furniture

Save time and resources in your manufacturing process with sandwich panels. These fully customizable elements provide lightness and strength, addressing the challenges and demands of the mobility sector.

Resistant composite or aerospace-grade aluminum skin.

Lightweight foam core, 45% recycled origin.

High-performance two-component adhesive.

Reduced weight and durable material

Customizable with aesthetic finishes

Easy assembly process
